**Ten Years. Three Data Centers.
And a NEW Tier IV Facility Just Opened.
How's that for Uptime!**

Join us January 21, 2010 as CoSentry celebrates our 10th Business Year with the official commissioning of yet another Data Center within our network of highly secure high density computing facilities. The new and highly acclaimed [Midlands Data Center](#) is a Tier IV+ facility located in Papillion, Nebraska. Its opening ushers in another level of performance to CoSentry's existing world class services and "Always On" environment.

To accommodate the leadership from our region and beyond who have expressed their well wishes, we have extended our celebration by adding a week of VIP tour dates to the schedule.

Due to security and regulatory requirements, you must RSVP to visit and tour the center. [Click here to RSVP.](#)
