

FOR RELEASE OCTOBER 1, 2011

CARTERENERGY SELECTS COSENTRY TO PROVIDE SECURE CO-LOCATION SERVICES IN KANSAS CITY DATA CENTER FACILITY

(Kansas City, MO) – CarterEnergy Corporation has selected CoSentry to provide co-location and data center services for its backup IT infrastructure and business applications. Utilizing CoSentry’s North [Kansas City Data Center](#), CarterEnergy has partnered with one of the Midwest’s most secure and reliable data center providers. The upgrade will ensure the uninterrupted availability of their critical systems and the information-driven, quality service they provide to their customers.

Doug West, Vice President and General Manager of CoSentry [KC Data Center](#) operations, commented, "We are pleased to partner with CarterEnergy to provide the data center facility, and services they require to support their business objectives. CarterEnergy has a rich tradition of serving the petroleum industry, and we take our responsibility to support their critical IT Systems and information very seriously."

Kerry Oliver, Executive Vice President and General Manager for CarterEnergy stated, "We were very impressed with the CoSentry Kansas City facility and their commitment to security. The overall resiliency and redundancy of their data center infrastructure was a major factor in our decision to partner with CoSentry. We are very confident in their ability to deliver the levels of security that we require."

CarterEnergy will actively operate both corporate as well as backup environments, and thereby ensure that critical systems and data are always available. Mark Dodds, Solutions Consultant with CoSentry in Kansas City stated that "CarterEnergy was very thoughtful in their approach to designing a Disaster Recovery program, and we look forward to continuing to be a part of their planning processes moving forward."

About CoSentry

CoSentry serves as a one source provider of data center, cloud computing and managed technical services. For over 10 years, CoSentry has been helping clients create and protect technology platforms to compete in today’s ALWAYS ON business environment.
